

1. Which of these are deterministic built-in functions?

- A. POWER
- B. CAST
- C. LOG
- D. ISDATE

**2. Which of the following program flow statements are supported by T-SQL?
**

- A. BEGIN...END
- B. IF...ELSE
- C. WHILE
- D. SWITCH CASE

3. In T-SQL programming, one or more T-SQL statements can be combined into one unit as a _____ and submitted to the server.

- A. Batch
- B. Store Procedure
- C. Trigger
- D. Script

4. Identify the properties of a logical unit of work.

- A. Atomicity
- B. Consistency
- C. Efficiency
- D. Durability

5. _____ marks an end of a successful implicit or explicit transaction.

- A. BEGIN TRANSACTION
- B. COMMIT TRANSACTION
- C. FIRST TRANSACTION
- D. LAST TRANSACTION

6. What are the types of errors that occur when code cannot be parsed by SQL Server?

- A. Syntax Errors
- B. Transact Error
- C. Information Error
- D. Run-time Error

7. Identify the instances where run-time errors occur.

- A. Performing a calculation such as division by 0
- B. Trying to execute code that is not defined clearly
- C. Performing a calculation such as multiplication with zero
- D. Keyword is used in a wrong way

8. Which lock places an exclusive lock on the resource that is at a lower level in the lock hierarchy?

- A. IS
- B. IX
- C. SIX
- D. SIU

9. Where are system databases used?

- A. Auditing
- B. Recovery
- C. Execute user transactions
- D. Store user data

**10. Which of the following statements are true about user-defined databases?

- A. Can be customized according to the requirements of the user
- B. Have a pre-defined structure that cannot be altered
- C. Are same as system databases
- D. Cannot be deleted from the server

**11. Using the CONVERT() function, a value of one data type can be transformed to another. Which syntax achieves this?

- A. CONVERT(datatype1, datatype2)
- B. CONVERT(datatype[(length)], expression[, style])
- C. CONVERT(datatype, expression)
- D. CONVERT(expression1, expression2)

**12. The three basic statements of DCL are _____. **

- A. REVOKE Statement
- B. UPDATE Statement
- C. GRANT Statement
- D. DENY Statement

**13. What will be the result of executing the following code snippet?

...

```
DECLARE @Var1 int;  
SET @Var1 = 5 + 2 * (8 - 3)
```

```
SELECT @Var1  
...
```

- A. 15
- B. 25
- C. 30
- D. 35

14. With which of the following columns can DEFAULT definitions *not* be created?

- A. A timestamp data type
- B. An IDENTITY and ROWGUIDCOL property
- C. An existing default definition
- D. A table with nullable rows and columns

15. Which of the following code snippets creates a table using the NULL and NOT NULL keywords?

- A. CREATE TABLE BookDetails (BookID int, Name varchar(40))
- B. CREATE BookDetails (BookID int NOT NULL, Name varchar(40) NULL)
- C. CREATE TABLE BookDetails (BookID int NULL; Name varchar(40) NULL)
- D. CREATE TABLE BookDetails (BookID int NOT NULL, Name varchar(40) NULL)
