

****1. There are many logical database components. You can use _____ to enforce the uniqueness of rows in a table.****

- A. Function
- B. Stored procedure
- C. View
- D. Index

****2. _____ is the smallest unit of data storage.****

- A. Data File
- B. Data Page
- C. Page Names
- D. File Names

****3. Which index type sorts and stores the data rows of a table or view in order, based on the clustered index key?****

- A. Nonclustered
- B. Unique
- C. Clustered
- D. Filtered

****4. The three basic statements of DCL are _____.****

- A. REVOKE Statement
- B. UPDATE Statement
- C. GRANT Statement
- D. DENY Statement

****5. Which of the following are DML statements?****

- A. ALTER
- B. DROP
- C. DELETE
- D. INSERT

****6. Which of the following information is required to create a user-defined database?****

- A. 1, 2, 3, 4, 5, 6
- B. 2, 4
- C. 2, 3, 4, 6
- D. 1, 2, 3, 4

****7. What are the disadvantages of database snapshot?****

- A. Provides read-only copy of data
- B. Snapshot backup cannot be created
- C. A new user cannot be granted access to the data in snapshot
- D. Snapshot files are small and cannot be created easily

****8. What will be the result of executing the following code snippet?****

...

```
DECLARE @Var1 int;  
SET @Var1 = 5 + 2 * (8 - 3)
```

SELECT @Var1
`

- A. 15
- B. 25
- C. 30
- D. 35

****9. Identify the statement that will create a table named Invoice with columns as CompanyName, CompanyAddr, DateofPurchase, Cost with default value set to 200.****

- A. ``CREATE TABLE Invoice(CompanyName varchar(40), CompanyAddr varchar(40), DateofPurchase date, Cost int DEFAULT VALUE (200))``
- B. ``CREATE TABLE Invoice(CompanyName varchar(40), CompanyAddr varchar(40), DateofPurchase date, Cost int 200 AS DEFAULT)``
- C. ``CREATE TABLE Invoice(CompanyName varchar(40), CompanyAddr varchar(40), DateofPurchase date, Cost DEFAULT 200)``
- D. ``CREATE TABLE Invoice(CompanyName varchar(40), CompanyAddr varchar(40), DateofPurchase date, Cost int DEFAULT (200))``

****10. Identify the code snippet to create a table named BookDetails with columns BookName, BookAuthor, BookCost where BookName cannot be NULL.****

- A. ``CREATE TABLE BookDetails (BookName varchar(50) NOT NULL, BookAuthor varchar(40), BookCost int)``
- B. ``CREATE TABLE BookDetails (BookName varchar(50) NO NULL, BookAuthor varchar(40), BookCost int)``
- C. ``CREATE TABLE BookDetails (BookName varchar(50) NOT NULLABLE, BookAuthor varchar(40), BookCost int)``
- D. ``CREATE TABLE BookDetails (BookName varchar(50), BookAuthor varchar(40), BookCost int)``

****11. What is the purpose of GROUP BY clause?****

- A. To arrange similar data into groups
- B. To insert a new row from the source table to the target table
- C. To sort the result set in ascending order
- D. To sort the result set in descending order

****12. Which of the following are the special tables used by DML triggers?****

- A. Inserted table
- B. Updated table
- C. Deleted table
- D. Created table

****13. _____ keyword is used to create a view using columns from multiple tables.****

- A. INSERT
- B. UNION
- C. JOIN
- D. UPDATE

****14. The architecture of calling one procedure from another procedure is referred to as _____ architecture.****

- A. Nested Procedure
- B. Joined Procedures
- C. Inner Procedure
- D. Transaction

****15. Which of the following statements is NOT correct about views?****

- A. A view can be created on temporary tables.
- B. A view cannot have a full-text index.
- C. A view cannot contain the DEFAULT definition.
- D. Views cannot reference more than 1,024 columns.
